

EMPTY FILE FINDER

Let's use the power of the append function

EMPTY FILE FINDER

ReadDir() returns []FileInfo values for each file in a given directory

ioutil.**ReadDir**

[]**os.FileInfo**

Each FileInfo value
has **methods** like:
Name and **Size**

File name:

nonEmpty1.txt

empty1.txt

empty2.txt

File size:

23 bytes

0 bytes

0 bytes

Name() string **Size()** int64
